DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to displaying visual content based on input description, classified in class 345, subclass 619.
- II. Claims 27-34, drawn to transmitting data between plural servers and a client computer, classified in class 709, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct, each from the other because of the following reasons:

Group I can functions independently from Group II because a multicomputer or a plurality of servers need not be required in order to display a visual content on a client display, as called for in Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and also because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
